

KS Steering Wheel

01 Product Introduction

- 300mm GT Wheel
- Programmable Short Travel RGB Buttons
- Real Racing QR System
- Hall Sensor Magnetic Paddles with Dual Clutch
- Injection Moulded TPE Rubber Grips
- Compatible with 3rd Party Wheelbases via Direct PC Connection

02 QR Use Guide

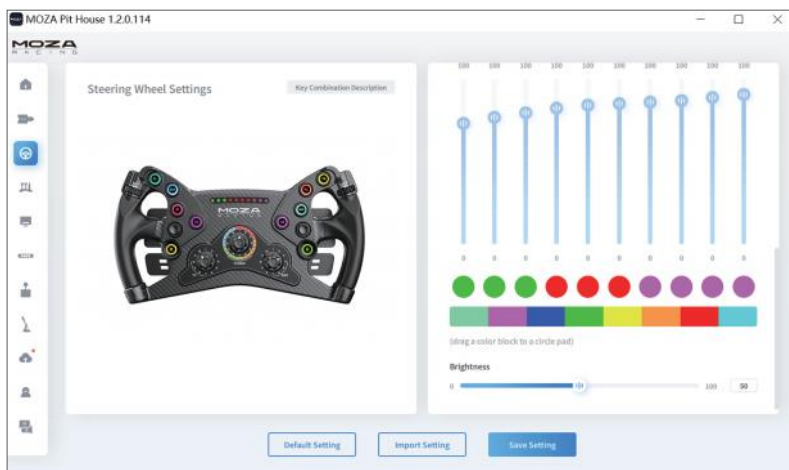

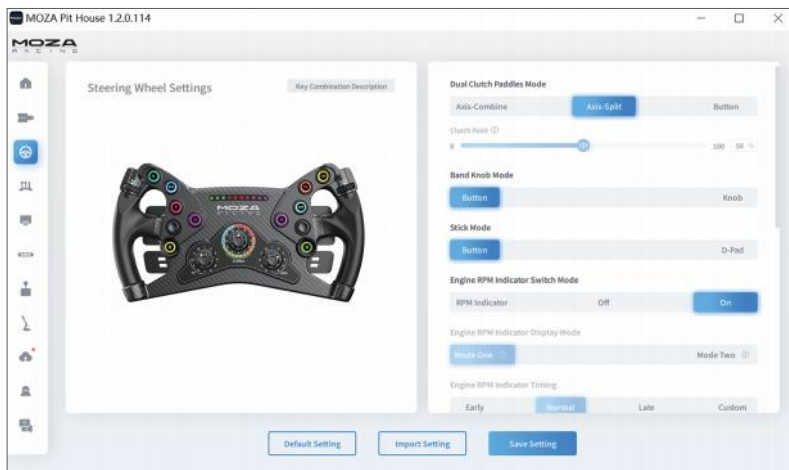

1. Align the 6 ball bearings on the wheel QR with the 6 notches on the base QR mount.
2. Press the quick release onto the base mount keeping the bearings and notches aligned.
3. The quick release will automatically lock in to place, if it doesn't then remove it, recheck the alignment and try again.
4. To remove the wheel, squeeze the black quick release part with the Moza logo towards the wheel with both hands and pull out the wheel at the same time.

03 Steering Wheel Configuration

The wheel can be set up quickly and easily in the Moza Pit House software.

- **Clutch shifter paddle modes:** can be set to combined axis, independent axis, and buttons
- **Rotary encoder modes:** can be set to button or knob
- **Joystick modes:** can be set to button or D-pad
- **RPM indicator switch modes:** choice of three modes; rpm, off and constant
- **Indicator modes:** there are two modes, mode 1 and mode 2, both are explained in detail when the mouse is hovered over the corresponding option
- **RPM indicator timing:** choose between early, normal, late or custom to fully match in-game RPM timing
- **Brightness:** adjust the brightness of the RPM/ shift LEDs
- **Button combinations:** click on the button combination description tab on the upper right corner of the steering wheel page to show a list of button input numbers and programming input combinations

- **RPM light color:** drag the color block onto the RPM light to change its colors
- **Change button colors:** to enter the setup mode, you need to push the left joystick to the right and the right joystick to the left simultaneously and hold until the gear shift indicator light flashes yellow. Once in setup mode pressing each button will cycle through its available colors. When you have set each button color, simply push the left joystick to the right and the right joystick to the left simultaneously and hold until the rpm leds flash again to exit programming mode.

(For detailed steering wheel settings and functions, please visit the Moza Racing official website)

04 Packing List

1. Steering wheel
2. Moza logo stickers
3. Dust bag

05 Specs

Grip Material: TPE

Paddle Material: Aluminum

Size: 300*165*120mm

Magnetic Paddles: 2

Backlit Buttons: 10

Clutch Paddles: 2

Rotary Encoders: 3

Thumb Encoders: 2

Joysticks: 2

High Brightness RGB LEDs: 10

LED Colors: 8 Customizable Colors

Intelligent Telemetry: Supported

RPM LEDs Fully Adjustable through Moza Pit

House: Supported

Release Method: Moza Quick Release

Magnetic Paddles Sensor: Hall Sensor

Paddle Mode Adjustment: Supported
